

BLAKEHURST OSHC TERM 4 2020

BLAKEHURST OSHC TERM 4 WEEK 6

We started off the week bringing out the board game twister. The children hadn't played it much at BASC, so it became the favourite activity of the week. Especially with the hot weather on Monday, they could take their shoes off and keep cool inside.

On Tuesday we got a worm farm! Our Carlton OSHC had a spare, so they kindly gave it to us. We placed our worm farm underneath a tree near our KCS garden. The children were so happy to search through the container and find worms to play with, they even named a few. We also planted our strawberry plants into the garden while we were down there.

On Wednesday, we made pizza scrolls at BSC with Jasmine. It was a great snack to make and also helped us achieve this week's task to save water in our program 'Love Our Earth'. We didn't need to use plates or cutlery to serve afternoon tea, which meant less water usage to clean up! We also played survival tag and oz-tag to get pumped for the State of Origin decider.

On Thursday we had our science program and the topic was fossils. We made a big batch of play-dough and the children got to choose which colour they would like. We then spoke about how fossils were formed millions of years ago by dinosaurs and how we can make our own with handprints.

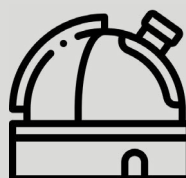

2021 OSHC BOOKINGS ARE NOW OPEN

ACTIVITIES TO TRY AT HOME

CHOCOLATE CRACKLES
